5. [REDACTED], NSA, indicated that [REDACTED] would be the main points concerned with the production and dissemination of intelligence items in NSA.

6. Each of the above mentioned items were discussed at length for the purpose of determining activities at which it might be appropriate to apply content control to intelligence items. These activities were then discussed to determine which should be requested to brief the Task Team. It was decided that when such briefings were arranged, it would be useful to encourage the activities selected to attend each other's briefings. Attendance by them at these Task Team briefings would, however, be completely optional. It was agreed that prior to the scheduled briefings members would attempt to acquire pertinent, existing documentation on the activities and their methods and techniques for controlling the substantive information on documents.

7. The following activities were selected to provide briefings:

DIA

1. Dissemination Center (DIAAQ-3)
2. Scientific and Technical Intelligence (DIASIT)

CIA

1. Document Division (DD)
2. Foreign Documents Division (FDD)
3. Foreign Broadcast Information Division (FBID)

NPIC and Cable Secretariat will be contacted and encouraged to attend initial briefings in order to determine their interest. Foreign Intelligence Staff, DDP, and Contact Division, OO, were identified as potential points for application of content control and their participation will also be requested.

8. DIA presentations were scheduled for 1330, 29 September 1964, at Arlington Hall Station. Subsequently, CIA presentations are planned for 13 and 27 October.
